

## Skill - 5

### 1. Quoting in Shell

```
harshika@siri: ~  
memory  
harshika@siri:~$ gedit skill5.sh  
  
** (gedit:1169): WARNING **: 03:52:21.373: Could not load Peas repository: TypeLib file for namespace 'Peas', version '1.0' not found  
  
** (gedit:1169): WARNING **: 03:52:21.373: Could not load PeasGtk repository : TypeLib file for namespace 'PeasGtk', version '1.0' not found  
harshika@siri:~$ chmod +x skill5.sh  
harshika@siri:~$ ./skill5.sh  
  
===== SKILL 5 - SHELL QUOTING =====  
=====
```

```
1. SINGLE QUOTES  
-----  
Name is: $name  
Course is: $course  
  
Single quotes preserve the content literally.  
Variables are NOT expanded.
```

```
2. DOUBLE QUOTES  
-----  
Name is: Harshika  
Course is: Operating Systems  
  
Double quotes allow variable expansion.
```

```
3. PRESERVING SPACES  
-----  
Text stored in variable:  
Linux Shell Programming
```

```
4. STORING QUOTED STRINGS  
-----  
This is a single quoted string  
This is a double quoted string
```

```
1 #!/bin/bash  
2  
3 echo "===== "  
4 echo " SKILL 5 - SHELL QUOTING "
